

Sustainable Aramid Solutions

Overlays/High RAP content/Interlayers

Let'sPave

Let's Pave has partnered with Surface Tech, a global leader in asphalt and concrete additive solutions, to offer ACE XP™ polymer fiber asphalt additive. This product makes asphalt pavement stronger and last longer, thus increasing life expectancy, reducing maintenance costs, and providing enhanced sustainability to pavement.

The installation of this product on parking lots, both new and maintenance, can lessen the amount of overall materials with fewer truck loads and fewer emissions at a possible cost reduction. This also creates less down time.

Cost Savings

- Higher performance leads to longer life and increases ROI
- Delays routine maintenance
- Ability to reduce standard overlay materials
- Renders aramid-add neutral cost

Performance

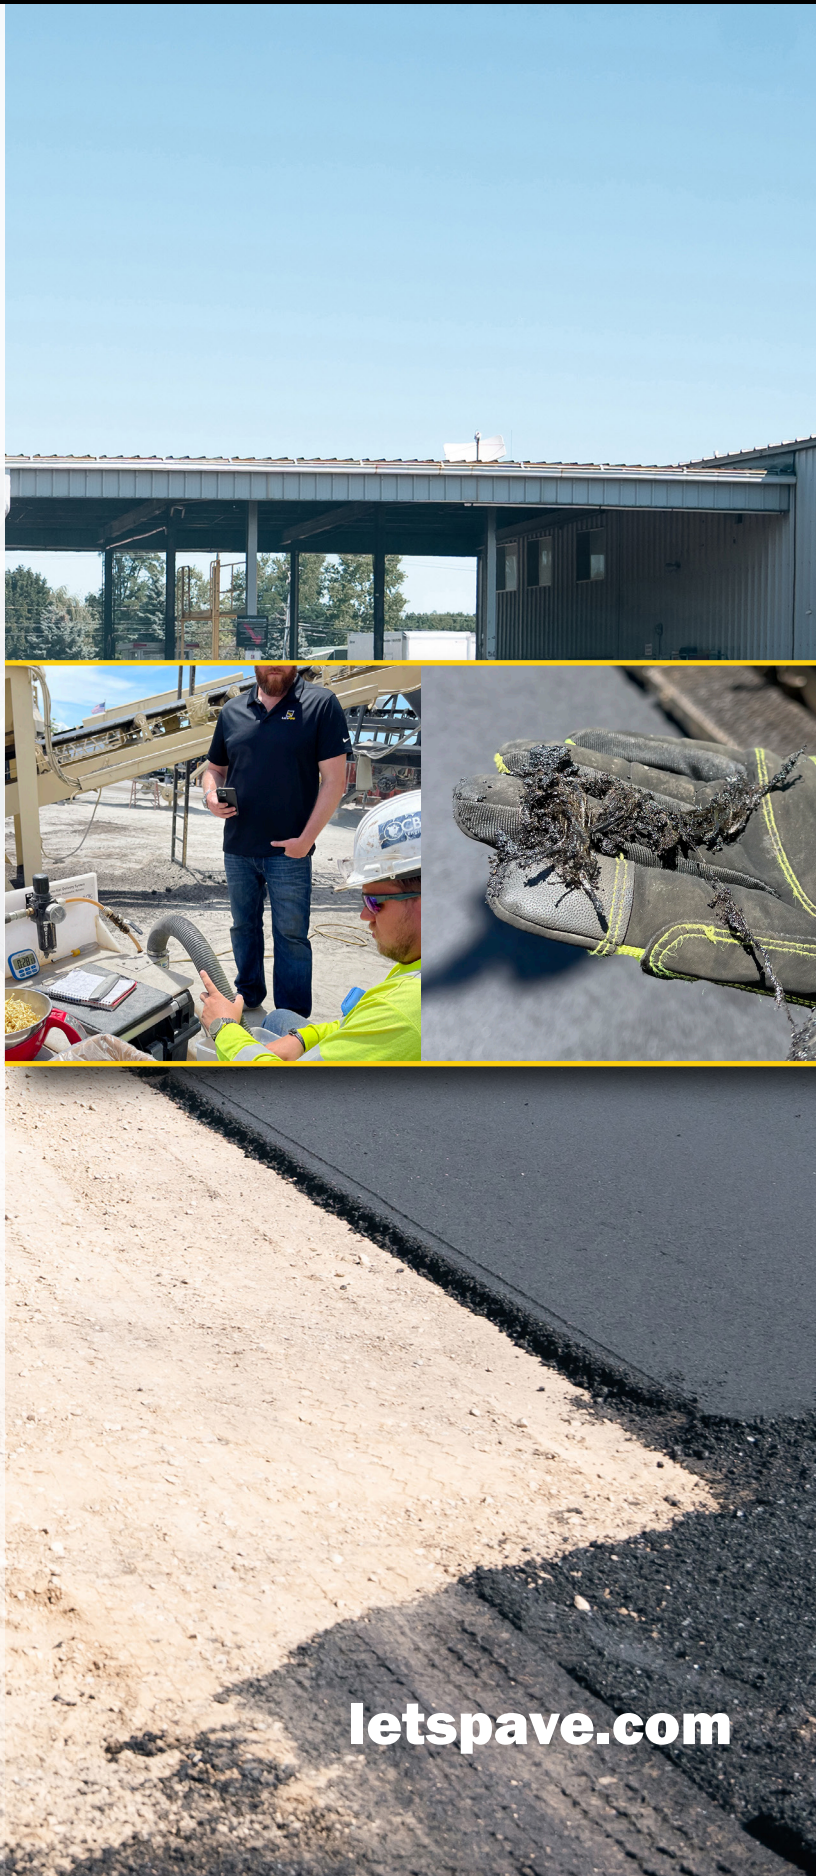

- Reduces cracking 30-50%
- Reduces rutting 10-15%
- Adds longer life expectancy up to 50%
- Improves compactability
- No change to mix design
- No special equipment

Sustainability ACE XP

- Potential to reduce emissions
- Recycled product
- Can reduce PG grade by using this polymer fiber
- Complements LEED accreditations

Ease of Adoption

- Proven partner in Let's Pave
- Fit critical path insertions at plant sites
- Possible reduction of disruption to current processes
